ISO/IEC 17025:2005 For Testing / Calibration Laboratories

Now you have a choice!

Become a World Class Testing/Calibration Laboratory with ACCAB 17025 Platinum Plus™ Accreditation.

ISO/IEC 17025:2005 standard is mainly used by testing and calibration laboratories. Initially known as ISO/IEC Guide 25, though there are many commonalities with Requirements and it applies directly to those organizations that produce testing and Calibration results/certificates.

Laboratories use ISO/IEC 17025 to implement a quality system aimed at improving their ability to consistently produce valid results. It is also the basis for accreditation from an Accreditation Body. Since the standard is about competence, accreditation is simply formal recognition of a demonstration of that competence. **It is a mistaken belief that ISO 17025 accreditation is government controlled.**

ACCAB 17025 Platinum Plus™ Accreditation requires that the Testing and Calibration Laboratories must conform to the most recent version of the following standards:

1. ISO/IEC 17025:2005 - General requirements for the competence of Testing and Calibration Laboratories.
2. Demonstrated Technical Competence specific to the field in which Testing / Calibration is performed.
3. Any additional requirements established by ACCAB from time to time.

Accreditation Commission for Conformity Assessment Bodies (ACCAB)
is an affiliate member of
International Laboratory Accreditation Cooperation (ILAC).
