

PTA Food Proficiency TESTING PROGRAMS

PTA offers food proficiency testing programs for laboratories to monitor the quality of their issued results.

These programs include:

- Pathogens in Food
- Non-Pathogens in Food
- Food (Chemistry)
- Wine

PTA's food programs are designed to meet the needs of industry and attract regular participants worldwide.

PTA programs have been used by laboratories to satisfy accreditation requirements, educate staff, verify methods and procedures, enhance accuracy, demonstrate competence, assess performance, compare with peers, monitor analysis, identify problems and improve testing.
